Multifile Perforated Powered Locker

Movable power...wherever you want it, whenever you need it.

Multifile's Locker Power System is an innovative perforated charging locker designed to charge laptops, notebooks, mobile phones, portable tool batteries, and other portable devices. Importantly, the locker's 22mm perforations maximize airflow in warmer environments or where heat is generated from the charging device(s). The Locker Power System is available as single or multiple units connected together utilising only one power lead (some limitations apply).

How it works

The Mainline™ powered track that runs the full length of each locker contains three copper strips (busbars) which carry the live, earth and neutral cables of the power supply and houses them in a safe, discreet manner so that they are only accessible through specially designed sockets. The powered track accommodates 240 volt GPO sockets, dual USB sockets and the soon to be released USB-C socket. Additional sockets can be ordered as optional extras. The sockets simply insert into the track and twist 90° clockwise to make a connection. Each socket can easily be inserted anywhere along the track. To release, just push a button and turn anticlockwise. To secure the socket on a permanent basis insert a specially supplied screw in the side to prevent unlocking.

Specifications

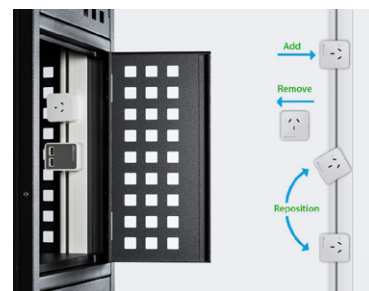

- Four tier Locker with 22mm perforations
- Welded frame to provide strength and stability
- Perimeter door surround to prevent doors from being forced inwards
- Full length internal door reinforcing for added strength
- Grey Stipple Powder-coated finish (other colours optional extra)
- 4 GPO - one socket per tier (more can be ordered as optional extras)
- 8 USB Ports - one dual USB socket per tier (more can be ordered as optional extras)

Dimensions – Four Tier

1803H x 381W x 450D
404H x 327W - Door

Options

One, two or, three tier lockers also available
USB Socket
GPO Socket

240V GPO Socket

Dual USB Socket

Mainline System	
Single phase wall / surface mounted power track	
Rated Voltage:	Up to 250Vac
Rated continuous current:	Up to 32 Amps ac
Environment for use:	Indoor areas
Degree of protection:	IP2Xd
Dielectric strength:	3kVac for 1 minute
Flammability:	Self-extinguishing UL 94-5VA
Track material:	High impact rigid PVC
Adaptor contacts engaged within a system of stamped copper busbars fitted into a thermoplastic track	
Adaptors can be connected and disconnected when system is energised.	

Product conforms to National Standards	
Single phase power track	MLP1 - 10A Socket
IEC61524-1, AZ/NZS61534-1	AS/NZS 3112
IEC61534-21, AZ/NZS61534-21	

Clipsal Safety Switch-952	
Amperage	10A
Voltage	Voltage 250V a.c. 50Hz
Tripping Current	30mA
Total Load	2400W
Flex suitability 0.75 to 1.5mm ² ordinary duty	
AS/NZS 3100 and AS/NZS 3112	
AS/NZS 3190, Class L
